

# Bachman Bay Kennel

Val C. Bachman • 4786 S 7500 W • Hooper, UT 84315  
Phone 801-985-1398/FAX 801-985-9610 • E-mail top\_hunter\_guy@hotmail.com

Thank you for your inquiry on the German Wirehaired Pointer (GWP) pups I will have for sale. This litter will be from breeding my Bachman Bay Adel NA UT CGC (dam) to Black Canyon Gabriel NA UT CGC (sire).

**The Litter Dam:** Bachman Bay Adel UT CGC ("Pink") is a North American Versatile Hunting Dog Association (NAVHDA-see [www.navhda.org](http://www.navhda.org)) Natural Ability (NA) and Utility (UT) dog. She is an American Kennel Club (AKC-see [www.akc.org](http://www.akc.org)) Canine Good Citizen (CGC) titled dog and has passed hunting field and water tests at their highest Master Hunter (MH) level, also. She was the "Top Pick" from an exceptional litter of pups that became high scoring NAVHDA UTs, International Versatile Champion (VC), National Pheasant Championship winner (CH), AKC Master Hunter (MH) and CGC qualifiers, Breeder Award Litter Producers (BALP), Dog or Handler of the Year recipients, Kennel Foundation Dams, Professional Wildlife Biologist's survey and census, Profession Guide's hunting, or just generally great hunting dogs.

Pink is a third generation UT and BALP dam. UT dams in her background were all "Top Picks" that produced "Breeders Award Litters". Her pedigree's prepotent UT sires, which were campaigned more intensely than the dams, are also titled Versatile Champion (VC) or AKC Field Champion (FC or AFC). The results of this consecutive three-generation UT/BALP breeding are each following generations has trained easier to high UT scores at younger ages and increased overall pup quality.

Pink's NAVHDA tests scored 108, Prize I in NA and 197, Prize II in UT. She passed UT with near-perfect performance at a very young age; on the day she turned 17 months old. Her testing resulted in "Dog of the Year" and "Handler of the Year" awards from the Utah and Idaho NAVHDA chapters, respectfully. She has passed AKC Masters Hunter (highest level) field and water, and obedience tests, as well.

Pink is affectionate, biddable, intelligent, learns quickly and retains well. She has tremendous desire and endurance. Other dogs are rotational braced around her during extended hunts, because she does not tire out. Her range is medium in cover to wide in open areas. Her silent ground covering gait, bird-finding ability, intelligence and sharp nose allows her to easily locate and pin spooky birds, such as sharptails and huns, that many dogs have difficulty with. Thousands of wild upland game birds have been shot over her. She is nearly flawless in her water fowling and general water work, as well. Her hips are OFA good and teeth are normal. Currently, her coat is flat, medium length, harsh, dense, oily, and double layered with a solid liver roan base and silver guard hairs. She has full furnishings and a classical GWP look about her.

As a mother, Pink is attentive and produces large litters that have had 100% survival. Her pups have been healthy, friendly, early maturing, intelligent, high in desire, and those tested have scored highly in NAVHDA UT at record breaking young ages. Like her mother and grandmother, she is a BALP with a proven history of whelping high performance pups. A well traveled, experienced, NAVHDA Senior Judge recognized her last litter as "... best German Wirehaired Pointer litter I have ever seen ..." after he evaluated four different pups in various tests. Other Judges have exclaimed some of her pup's performances as among the finest they had seen for any breed such as "... best overall NA field work...", "... best UT Water Search.", "... a perfect clinic on UT Retrieve of Duck.", "... most enthusiastic Retrieve by Drag..", etc. All Pink's pups are reportedly good to great hunting dogs.

**The Litter Sire:** Black Canyon Gabriel NA UT CGC ("Gab") is NAVHDA NA and UT and AKC CGC titled. He was the "Top Pick" from a litter, which has excellent parental lineage and high scoring NAVHDA or exceptional hunting dog littermates. Gab is a third generation UT and some UT dams in his background produced "Breeders Award Litters". Some of his pedigree UT sires, which were campaigned more intensely than the dams, are also titled AKC Field Champion (FC or AFC) or National Shoot To Retrieve Association (NSTRA) Champion (CH). In these three consecutive breeding of UT dog each following generation has trained easier to a high UT scores at younger ages and overall pup quality increased.

In NAVHDA tests, Gab scored 110 Prize 1 in NA and 201 Prize 1 in UT. His NA was completed at an exceptional young age of 8 months and UT at a very young 18 months. His testing resulted in a "Handler of the Year" award from Utah's NAVHDA Chapter. He is a young qualifier for the 2004 NAVHDA International Versatile Championship event.

Gab is biddable, attentive, intense, and strong. He has naturally thorough field search, intense pointing, automatic honoring, enthusiastic retrieving, high desire, high headed scenting, and consistent bird finding abilities. His hunting search is high in stamina, medium in range, handler attentive, cool running, brush busting, and thorough. He has demonstrated 100% location of planted or moving test and training birds. During his UT in a hot,

low humidity August test, he was the only dog all weekend to locate all his planted birds. He also located other birds missed by previously ran dogs! His pointing is as natural and intense as any dog I have seen or trained. His water work is tenacious, fearless, exciting to watch, and among the best his Judges or myself have viewed. He was easily prepared for NAVHDA tests and should perform well in AKC Master Hunter tests when entered. Gab's hip x-rays have been evaluated as good by OFA certification. His teeth, eyes, blood tests, and thermoregulation are normal. His winter coat is liver and white ticked, medium length, harsh, dense, quick drying, and cold resistant. He has full facial furnishings and a classical German Wirehaired Pointer look about him. Gab was purchased specifically for this line breeding providing paralleling, complimentary genes to the Bachman Bay line.

**Purchasing Puppies:** Puppies price is males \$550 and females \$650. For a pup reservation a \$150 deposit is due ASAP. This fee is non-refundable.

**A preference letter indicating the pup type and name you want must accompany the reservation deposit.** Be very specific as to sex, temperament, size, color, coat and other characteristics you desire. Please include information on hunting, testing, or trials you commonly participate in, if you have small children and where pups will be housed. I will try to provide the best pup for you. Also, mention what pup transferring arrangement you would like to use (see below). **A short (less than 12 letters) dog name starting with the letter F is requested for your pup.** As the F litter from this kennel, registered names must start with F. If you do not decide on a registration name I will assign one and you can "Call Name" the pup anything you want later.

**Receiving of Puppies:** Puppies can be viewed and played with anytime after they are five weeks old and are available to new owners at seven to ten weeks beginning April 21st. **All pups must be paid in full by cash, certified check, or money order before being released.** Personal checks can only be used if given a week in advance of pup transference.

Pups will be picked up here at seven to eight weeks old. Owners will be charged extra for pups held beyond eight weeks, unless I hold some for evaluation. Arrangements can be made for delivering pups locally or air shipment non-locally. If air shipped, I furnish crates (to be returned UPS), and arrange flights to your destination. Air shipments require prepayment and a health certificate. **All health certificates and air shipments or local delivery costs are buyer paid.**

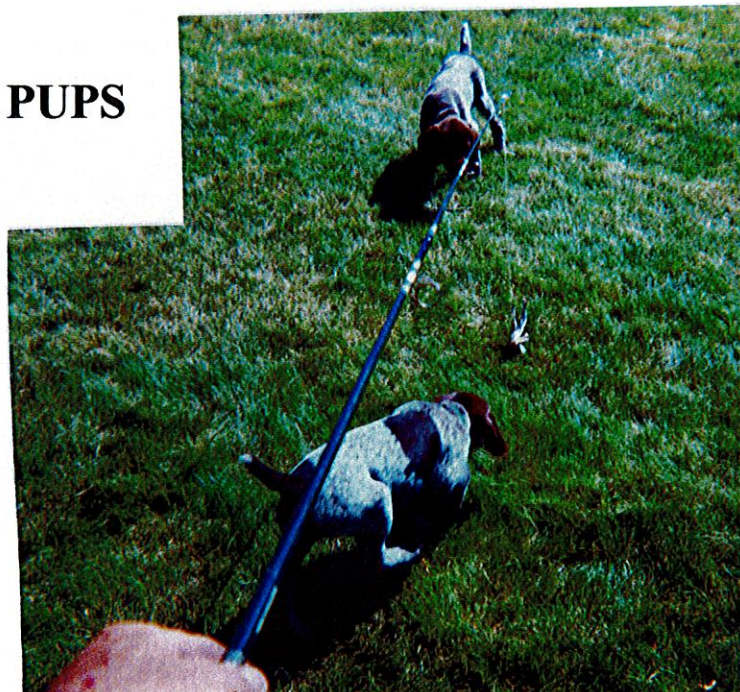

Puppies will be vaccinated, tail docked, dewclaws removed, wormed if needed, and registered and pedigreed with NAVHDA. The litter will be AKC registered and forms provided to individually register or pedigree if owners want to. A puppy starting kit will be included.

**After Transferring Services and Guarantees:** If the owner desires to test in NAVHDA, I provide literature, consultation, and assist with training in the field (if geographically feasible). I reimburse NA Test entrance fees if pups have been properly prepared, tested before 16 months, and score 95 or above. Or, for a fee, I will prepare and test your pup. I will provide answers or refer you to a specialist on questions you have on GWPs, training, our litter lineage and progress, other litter availability, breeding, etc.

**All puppies are unconditionally guaranteed to be physically sound and contain inherited hunting abilities when released to you.**

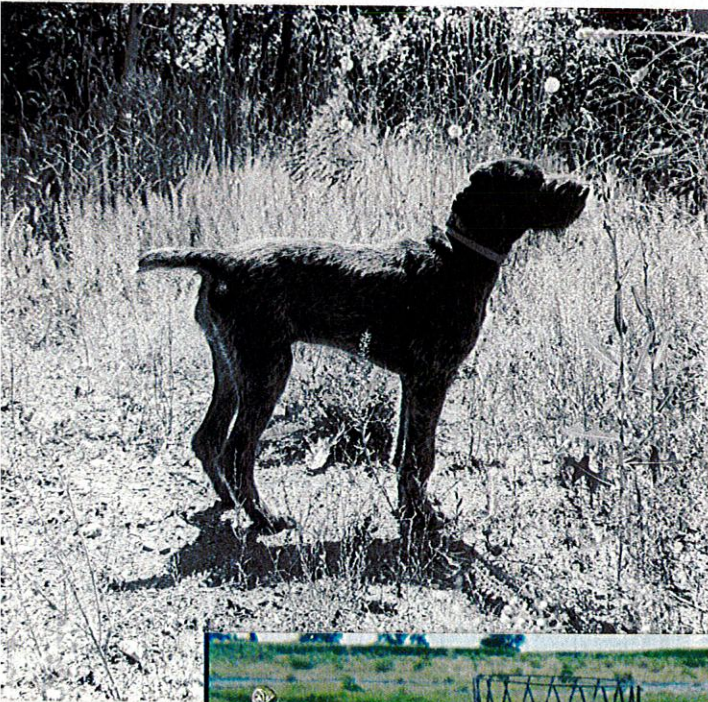

Thank you again!

## PINK'S PUPS
